- Planter Boxes

Have a water issue in your building? Give us an opportunity to demonstrate what we can do for you.

Reporting **Services**

- Levels of reporting include preliminary non-intrusive visual analysis, flood testing, and materials testing.
- Our experienced team comprises of Engineers, Building Certifiers, Waterproofing Consultants, and Hydraulic Specialists.
- Typical building defects identified include age deterioration, excess building movement, incorrect material specification, mechanical damage, hydrostatic pressure, damp substrates, and corrosion attack.

Membrane **Roofing Repair**

For more than 30 years Adseal has been involved in the application and remediation of membrane roof systems.

Typical roofing repair services include:

- Removal and replacement of aged membrane systems
- Refurbishment of deteriorated membrane and metal roofs and gutters
- Repair to facades and parapets
- Replacement of failed joint sealing
- Application of solar reflective coatings
- Installation of durable surfaces or membranes in trafficable areas

Remedial **Waterproofing**

Adseal Group provides solutions to resolve water ingress issues into building structures.

Typical waterproofing repair services include:

- Damp proofing plant room floors
- Repairs to lift pits and failed basement tanking
- Relining leaking planter boxes
- Repair of deteriorated concrete structures & membrane encapsulation
- Application of barrier and impregnation products to damp walls
- Repair to leaking balconies and decks
- Corrosion mitigation systems due to salt, chemicals, cooling towers
- Specialist expansion joint sealing to building movement applications
- Epoxy injection to bind up masonry surfaces or reduce moisture attack
